Asphalt Pavement Alliance presents

Perpetual Pavement Award

Date: December 11, 2019
Meeting: ACAF Annual Asphalt Conference & Trade Show
Asphalt Pavement Alliance

The APA is a partnership of the Asphalt Institute, National Asphalt Pavement Association, and the State Asphalt Pavement Associations.
How To Design A Road To Withstand Time, Traffic, and Taxpayers

Perpetual Pavement Design

Asphalt Surface
Renew periodically. Maintained to ensure a high level of drivability. Surface type can be customized depending upon needs: open-graded friction courses for safety, stone-matrix asphalt for added durability, Thinlays™ for pavement preservation, etc.

Asphalt Base
Stiff structural layer designed to distribute loads and resist structural rutting. Optimizes materials and costs with use of RAP, RAS, and other recycled materials.

Fatigue Resistant Asphalt Layer
Flexible layer designed to prevent fatigue cracking and bottom-up cracking. The overall thickness of the structure and the materials of this layer help limit the maximum tensile strain to below the fatigue endurance limit.

Pavement Foundation
The subgrade may be stabilized or unstabilized.
Perpetual Pavements

Perpetual pavements have been around for decades
This award honors asphalt pavements that were designed and built with outstanding care and exceptional quality. The result is a long-lasting pavement, one that serves the traveling public well, provides true value to the taxpayers, and demonstrates both the convenience and the quality of asphalt pavements.
Nominations Due By December 1

PERPETUAL PAVEMENT AWARD NOMINATION FORM

Criteria:
• 35+ years old
• 13+ years between overlays (average)
• No increase > 4"
Congratulations
